

Enemies

Construct 2

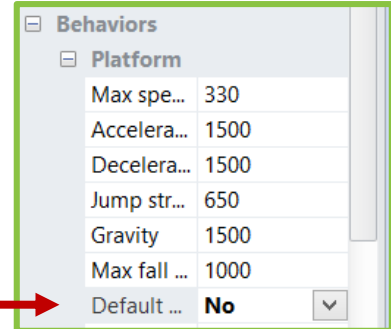

1. Create a new sprite for your enemy and place it in the top right hand corner.

3. Add the **Platform** behaviour to your enemy sprite.

2. Add a new behaviour to your enemy sprite.

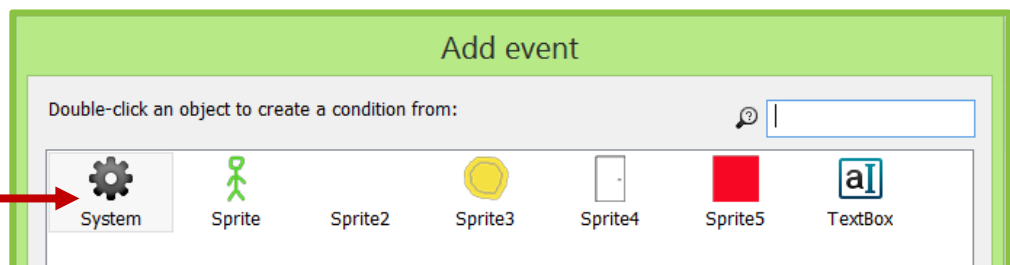

4. Set the **Default controls** to **No**.

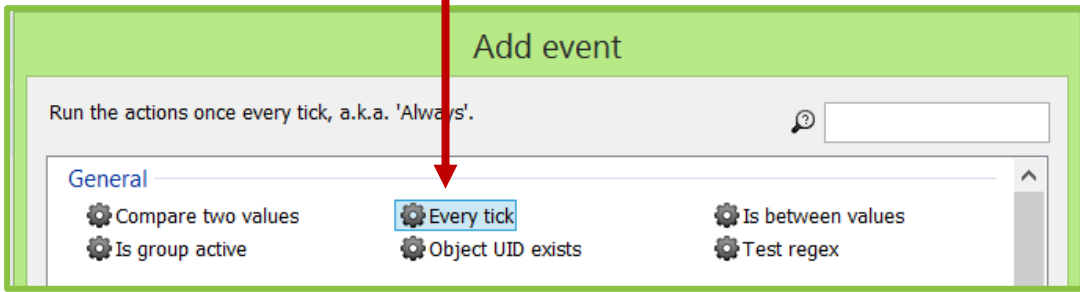

5. Add a new event.

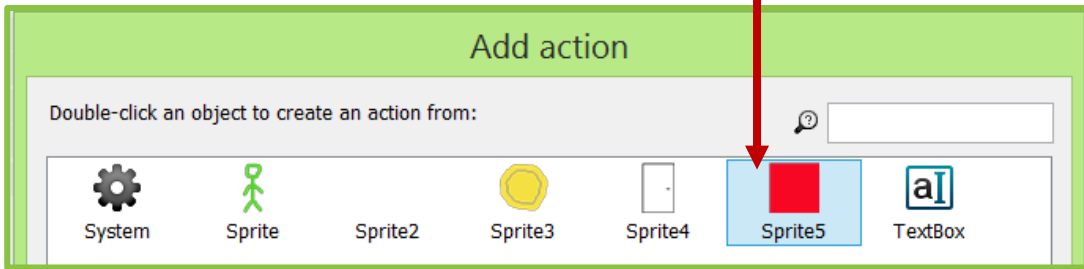

6. Select **System**.

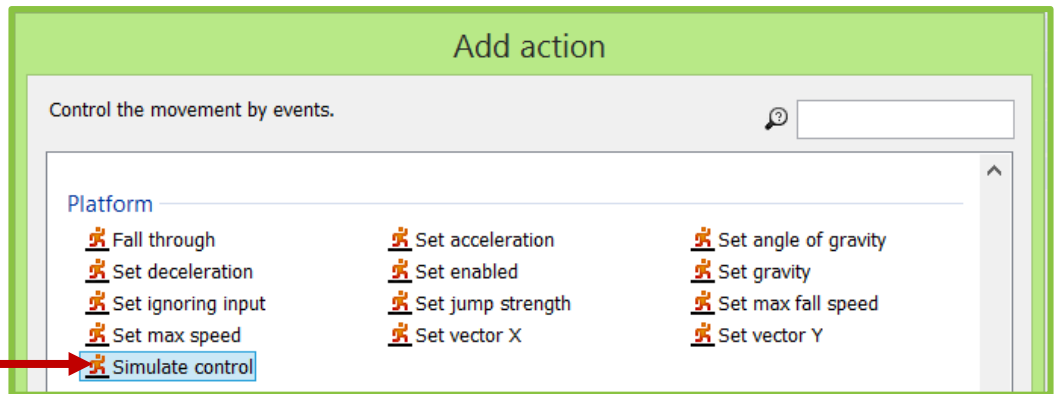

7. Choose **Every tick**, this means continuously repeat.

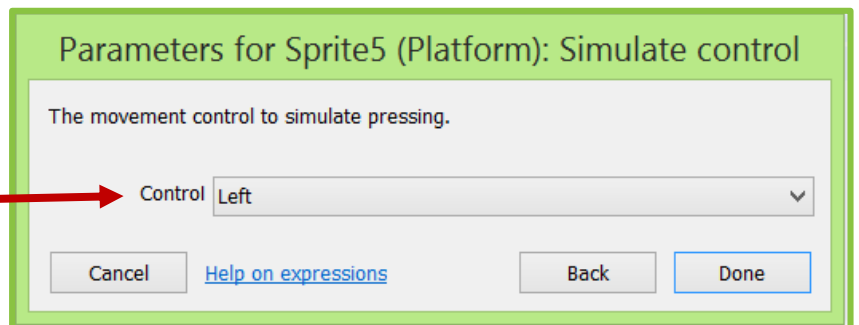

8. Add an action to your new event and choose your enemy.

9. Choose the **Simulate control** option.

10. Make sure the **Control** is set to **Left**. This will move your enemy left across the screen.

11. Finally create these events, with these actions.
